To Whom It May Concern

Testimonial Fast Patch

Most businesses today are looking for cost savings and innovations. Working at an Airport has its own challenges with Aircraft and Weather playing there part. These two factors alone account for 80% of the deterioration to our Taxiways and Runways. Aircraft traffic and increased loads associated with aircraft size and capacity have seen a faster deterioration rate compared to previous years.

Working with Eifers Services and Daniel Eifermann, we trialled Fast Patch on Taxiway Alpha South utilizing their new meter dispensing unit. Working together, we achieved what I was looking for having determined that the product was efficient and effective for our needs. This product has reduced my maintenance within this area by 90% allowing me to utilize my team elsewhere.

In working with Daniel who is always polite, timely and a great ambassador for Eifers Services and their products, I was able to source an alternate product to allay my maintenance issue on the airfield. We now use Fast Patch with great success using Buckets and Cartridges, enabling my team to repair small spalls and cracks. The beauty with this product is that is safe, efficient and practical, something that is required at our Airport.

I have no problem in recommending these products that we use and the services of Eifers, working with Daniel and Fast Patch has made a change across the business.

Regards

Richard Horton
