Daniel Eifermann
4/141 Sherbourne Road
MONTMORENCY VIC 3094

Dear Daniel

Vic Roads Metropolitan North West Region has reviewed and trialled for use the Fastpatch™ System of products on VicRoad roadways and bridges as applicable.

The Fastpatch two-part polyurethane, rapid setting pavement repair products have been used recently on a road pavement repair project to repair substantial cracks and stabilise moving concrete slabs. Not only did the repairs affected exceed expectations, they were finished in one six (6) hour shutdown, less than half the time anticipated to complete the given volume of repairs. This allowed for an early return to service, as completed sections were able to be trafficked one hour after they were placed. The early return to service also saved considerable costs in traffic control and supervision.

Of note also was the products' ease of use and safe application given that they contain zero VOCs.

VicRoads will be monitoring the trial site to assess its suitability/performance over the next twelve months and look forward to using Fastpatch Repair Products on future applications where flexible repairs and timely return to service requirements are important.

Yours sincerely

John Li Rosi
